🔗 fullylove.co.uk

A full stack engineer who's always looking to learn, with a love of problem solving and an affinity for design and UX.

Experience

Veygo

Full Stack Engineer

Jul 2021-Present

I've worked on multiple cross-functional teams and projects from delivering new insurance products to our customers, iterating on the experience of our website, to building scalable backend apis and services.

Gotten to lead on lots of projects as part of my role. Highlights would be the move to a Backend for Frontend model gaining experience in Node.js whilst developing our initial infrastructure and APIs setting the standards for future teams. And the creation of a component library, getting to work closely with design to align the look and feel of our web apps.

Mentoring others has also been a big part of my time here, helping other engineers has been great, whilst also improving my own understanding of different aspects of being an engineer from Agile ways of working to more technical concepts.

Junior Full Stack Engineer

Jul 2019-Jul 2021

Started my professional journey here joining an incredible team of engineers gaining experience with Typescript (React) and Python (Django) as part of an Agile Scrum team that was closely involved with different functions of the business working on existing insurance products.

Also involved in the refresh of Veygo's mobile app that offered our main insurance products to both Android and iOS users (React Native) gaining experience with different aspects of mobile development.

Skills

Typescript (React, React Native & Node)

Python (Django, Flask)

Infra (Terraform, Serverless)

CI/CD (CircleCI)

AWS

Pool 🏊

Education

Loughborough Uni

Sep 2016- Jul 2019

Computer Science - 2.1

Certifications

AWS Cloud Practitioner
